EXPERIENCE

Synx Games [⊕]   *February 2025 – Present*
Software Engineer (Internship)   Lincoln, UK

- Developing a brand-new Roblox experience from scratch, collaborating with another developer to ideate, design, and implement the game mechanics, user interface, and core features using TypeScript and React.
- Creating the game's business strategy and marketing plan, aligning the game's gameplay loop and progression system with monetisation opportunities to support sustainability, player engagement, and growth.
- Testing the game's performance, gathering and analysing player feedback in a closed beta to iteratively identify and fix bugs, improve user experience, and balance game mechanics.

B-Hive Innovations [⊕]   *May 2024 – September 2024*
Field Trials Technician (Temporary Contract)   Lincoln, UK

- Identified and resolved 8 critical reliability issues in Python-based applications for the TuberScan Venture project, leading to accurate data collection and improving result accuracy by 30%.
- Enhanced data collection processes by automating data processing and validation pipelines, reducing manual errors to 0 and saving up to 5 hours of work per week spent fixing errors.
- Collaborated in an Agile, Scrum-based environment with a team of 8, using kanban for task tracking and Git for version control, consistently meeting over 95% of sprint objectives.

Dollar Jeans [⊕]   *January 2023 – March 2024*
E-Commerce Technician   Lincoln, UK

- Managed an SQL database of 15,000+ products across eBay, Amazon, and Shopify, automating inventory updates for seamless synchronisation across platforms and generation of sales analytics for business insights.
- Optimised the product listing process by creating a Python script to automate generation of product descriptions and titles, reducing average listing time by 50% and saving up to 8 hours of work per week.

PROJECTS

Personal Portfolio Website (React)   *January 2025 – February 2025*

- Designed and prototyped a responsive personal portfolio website using JavaScript and React.   [⬡]
- Implemented a CI/CD pipeline with Vercel, automating deployment with every push to main on GitHub.

Library Management System (C++)   *October 2024 – January 2025*

- Developed a console-based library management system with CRUD operations and JSON data persistence.   [⬡]
- Implemented 40+ unit tests using Catch2 to facilitate continuous integration and Test-Driven Development.
- Integrated multithreading and socket-based networking, enabling concurrent user interactions and remote access.

Sentiment Analysis Tool (Python)   *September 2023 – May 2024*

- Designed and implemented a sentiment analysis tool leveraging BERT to process social media data, delivering   [⬡]
  sentiment predictions with 86.95% accuracy, furthering to 95% with k-fold cross-validation enabled.
- Optimised data pipelines with Pandas and NumPy, improving processing speed by up to 80% on large datasets.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, C++, C#
Web Development: React, Next.js, TailwindCSS, Django, Flask, Node.js, Express.js, RESTful APIs
Cloud & DevOps: Git, MySQL, MongoDB, Azure, Docker, Kubernetes, CI/CD, Vercel, Agile, SDLC

EDUCATION

University of Lincoln – MSc Computer Science: T.B.C. (86% Average)   *September 2025*
University of Lincoln – BSc Computer Science: First Class with Honours   *May 2024*

COURSES & CERTIFICATIONS

IBM – Full Stack Software Developer Professional Certificate   *September 2024 – September 2025*
IBM – DevOps and Software Engineering Professional Certificate   *September 2024 – March 2025*
Forage – Blackbird Australia: Software Engineering Job Simulation   *February 2025*

AWARDS

University of Lincoln – The Lincoln Award   *September 2024 – March 2025*
